Scoring Rubric for Photoshop Activity

Category	3	2	1	Total
----------	---	---	---	-------

Image selection for background image	Student has selected a background that is a minimum of 800 pixels wide and will serve the activity appropriately.	The background is less than 800 pixels wide but can work in the space.	The background is less than 500 pixels wide and pays little attention to space provided	
Cutting and Pasting	Accuracy in removing yourself from the photograph and pasting your image on the background. Looks as though you belong in the picture	Some parts of the image were lost in the cut and paste process and some of the green screen is visible.	Image is not convincing even after it has been touched up.	
Photograph enhancement	There are several ideas incorporated in the project that make it unique. Scale, glow, contrast and color are used effectively	The person appears to scale in the background, has no sign of green screen color and fits well in its surroundings.	The person in the picture is not convincing. There are obvious signs of manipulation.	
Lighting	The lighting of the image has been adjusted to make it consistent with the other objects in the scene	Making slight lighting changes in contrast, color and lighting angle would make the photo look more convincing.	Lighting is not appropriate to make the photo look convincing. There are sign that the image has been manipulated.
